
Summary

Full Stack Software Engineer obsessed with building clean, fast, and purposeful applications. Experienced in creating scalable web and app platforms, designing maintainable architectures, and refining user experiences beyond just functionality, with a constant focus on quality, performance, and long-term growth.

Skills

Languages: C, C++, TypeScript, Dart

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap

Backend/Frameworks: Node.js, Express.js, Next.js, Electron.js, Flutter, REST APIs

Database: MySQL, MongoDB, Redis

DevOps: CI/CD Pipelines, Docker, Nginx

Tools: Git, GitHub, Postman, Bruno, Figma, Adobe Photoshop

Concepts: System Design, API Design, Performance Optimization, UI/UX, OWASP Security Best Practices

Experience

RagyaTech Pvt.Ltd. | www.ragyatech.in

Full Stack Developer | August 2025 - Present

- Led end-to-end development of the [Apnii Car](#) vehicle rental platform using Next.js, TypeScript, Node.js, and MySQL, building both frontend and backend systems.
- Designed scalable database architecture, REST APIs, authentication workflows, audit logging, booking management, and Razorpay payment integration.
- Containerized and deployed applications using Docker and Nginx, contributing to scalable and reliable production infrastructure.
- Developed the Flutter mobile application for Apnii Car, enabling customers to browse, book, and manage vehicle rentals.
- Enhanced code quality and maintainability across multiple projects, including [Dual Leaf Mattress](#), through frontend development and backend refactoring.

Mazoku | www.mazoku.cc

TypeScript Backend Developer | March 2025 - August 2025

- Contributed to the development and maintenance of a TypeScript-based application, implementing new features, managing new event feature requirements, resolving issues, and improving existing functionality.
- Collaborated within a GitHub-based development workflow, working with branches, pull requests, code reviews, and version control best practices in a team environment.
- Worked with an established codebase to understand system architecture, deliver feature enhancements, and maintain code quality standards.

Nezuware | <https://share-away-showcase.vercel.app/>

Full Stack Developer Internship | April 2025 - May 2025

- Built ShareAway, a full-stack web platform using Next.js, Express.js, and MySQL, allowing users to share thoughts and stories in a secure environment.
- Developed end-to-end application architecture, including frontend interfaces, backend APIs, database integration, and user-focused UI/UX workflows.

Apna Competitive Corner

Web Developer Internship | Oct 2024 - Nov 2024

- Collaborated with a multidisciplinary team on the development of a group video-sharing platform, contributing to technical discussions, knowledge transfer, and project coordination.
 - Assisted in backend development and Figma-based product design, helping shape application architecture and user experience workflows.
-

Projects

Apnii Car | www.apniicar.in

- Developed a multi-role system (Admin, Vehicle Owner, User) enabling vehicle listings, bookings, wallet transactions, and withdrawals.
- Implemented KYC verification, email OTP login, and Razorpay integration for secure payments and user trust.
- Built with Next.js, MySQL, Tailwind CSS, and Zod, ensuring validation, responsiveness, and seamless UX.
- Added audit logging, reports, and booking history for transparency and traceability.
- Deployed on a Linux VPS using Docker & Nginx with load balancing for reliability and scalability

DualLeaf Mattress | www.dualleafmattress.com

- Developed key frontend modules using Next.js, TypeScript, and Tailwind CSS for product browsing, enquiry management, and administrative workflows.
- Contributed to backend development and refactoring efforts, improving code maintainability and supporting platform scalability.
- Implemented dashboard functionality for managing customer enquiries and product-related operations.
- Integrated ImageKit to optimize image delivery and improve website performance.

Games Manager Pro | <https://games-manager-pro.vercel.app>

- Developed a comprehensive management platform using Next.js, TypeScript, MySQL, and Redis for tracking game accounts, balances, transactions, and operational workflows.
- Designed dashboard systems for managing large volumes of account data, cross-trade activities, and performance analytics through centralized administrative controls.
- Implemented optimized database structures and backend workflows to support fast data retrieval, scalability, and operational efficiency.
- Built reusable frontend components and responsive dashboard interfaces focused on usability, maintainability, and real-time management operations.

File Encrypter / Decrypter Software | <https://file-encrypt-decrypter-website.vercel.app/>

- Built a desktop application using Electron, Node.js, and TypeScript for secure file encryption and decryption workflows.
- Implemented AES-based encryption mechanisms with password-protected processing and secure file handling operations.
- Developed intuitive user workflows for file selection, encryption, decryption, and export management.
- Created reusable architecture supporting both desktop and CLI-based encryption utilities for different usage scenarios.

Education

Bachelor of Computer Applications (BCA)

Signa Institute Of Professional Studies

CGPA: 7.80 • 2022 – 2025
